

HIKVISION[®]

One App For All

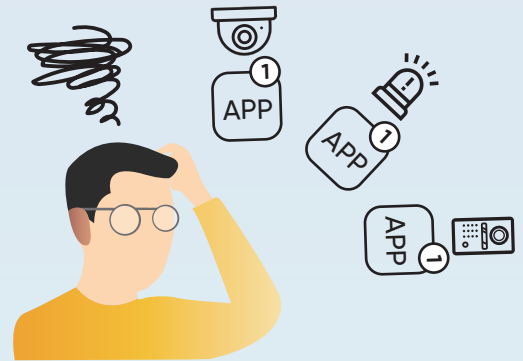

Hik-Connect Makes Security Easier

Pain Points and Requirements

End User

- Has to switch between different app to operate different electronic security products
- Limited integration, difficult to distinguish between real and false alarms
- Needs **one single app** to control all electronic security products

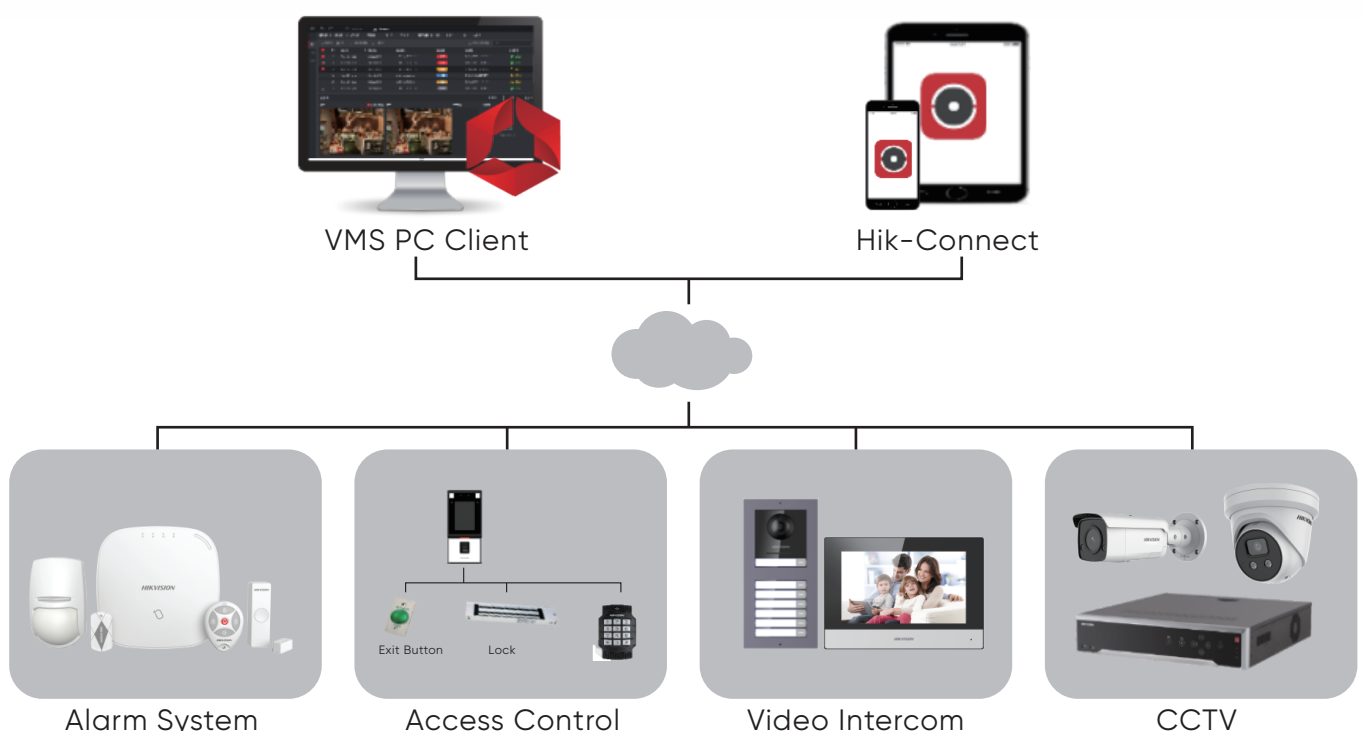

Installer

- Single installation, multi-suppliers – costs time for purchase, configuration and support
- Unforeseeable failures, hard to locate issue between different suppliers
- Wants **one stop purchase** and **one stop service**

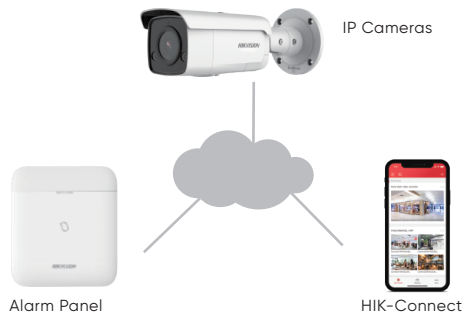

Hikvision's Offering

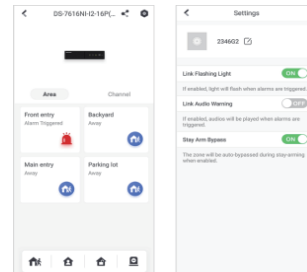

One platform for all, makes everything easier

Flexible linkage brings convenience

Video verification for different alarms

Arm/disarm your alarm system and/or Acusense cameras for complete internal/external security control and monitoring

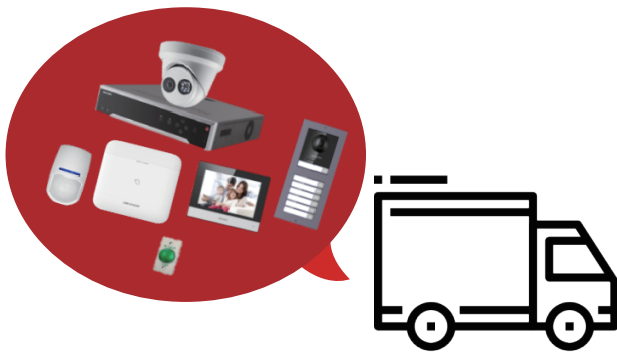

Triggering cameras' strobe light and audio warning to proactively deter crime

View your CCTV cameras from the intercom indoor station

Receive video call and remote door release

One stop purchase, one stop service

One stop purchase for all products, **save your time and cost**

Professional support team for full product lines, **ensure worry-free**

Additional Value

Easy Permission Sharing

Easy to share your devices with your family members, employees and tenants at the same time with limited permissions

Easy P2P Connection

Simplified network connection via P2P, no port mapping required.
